MEMORANDA OF IMPORTANT INFORMATION AND DETAILS

EXCERPT FROM THE CIVIL AIR REGULATIONS

CAR-01.730 AIRCRAFT LOG: The registered owner of a certificated aircraft shall maintain an aircraft log book therefor, and shall be responsible for recording in such log book current reports of line and periodic inspections, the flight time of the aircraft, rigging changes in the aircraft, and repairs and alterations of the aircraft structure and of the propeller.

CAR-01.732 The log books required in CAR-01.730 and CAR-01.731 shall be carried in such aircraft at all times when it is away from the landing area regularly used as its base of operations, provided, however, that log books for certificated airline aircraft may be maintained and kept at terminals.

INSTRUCTIONS FOR THE USE OF THIS LOG BOOK

All required data must be entered in the proper columns regularly. The column headed REMARKS is particularly important, for in that column must be entered the following information:

1. A record of all Line and Periodic inspections and results.
2. A record of all accidents in which the aircraft is involved, whether major or minor. All entries covering alterations or repairs to aircraft or propeller shall be endorsed by the certificated mechanic responsible for same, including his rating and certificate number.
3. A record of rigging changes; all repairs and alterations to aircraft or propeller; changes in engines or propellers; and a record of operation of both — installed, and also prior to installation.
4. When repairs or alterations to aircraft or propeller necessitate submission of Form AC-18-1 (Repairs and Alterations) the duplicate of this form shall be incorporated in the back of this book, and become a part hereof; and each such incorporated form shall be noted in the REMARKS column.
5. A record of all repairs to instruments used on certificated airline aircraft.

MAKE ALL ENTRIES WITH PEN AND INK — MAKE NO ERASURES
